

Clemson Student ASHRAE

~Presentation by Chuck Weaver November 30th 7pm Room
132 Flour Building~

A little about the
speaker:

Chuck has served Heating and Air Conditioning industry for almost 30 years and has extensive knowledge and experience with commercial, institutional, and industrial heating, ventilating, refrigeration, and air conditioning. He is a graduate of Clemson University with a BS in Mechanical Engineering, and holds an AS from Tri-County Technical College in General Technology. Chuck is an active member of ASHRAE. Chuck is the Managing Director or Acutherm, LLC a California based manufacturer of thermally powered, variable air volume diffusers and associated products for HVAC industry.

Abstract: What the HVAC industry has done for Chuck over the last 30 yrs. What ASHRAE has done for him. Variable volume devices and individual temperature control – Types, differences, energy, LEED. Thermally powered VAV diffusers – product demonstration. How do we move forward with a design strategy that truly looks at each small component's ability to turn down and operate at a partial load.

**Come join us at Fluor Building on Clemson
University. Food will be served!**
